

# How can lecturers and students work together to integrate sustainability into all fields of education?

We are excited to announce our talk with discussion within the oikos Academy 2023 on

 Wednesday, November 22, 2023, from

 7-8.30 pm (CET) at

 Room: HS 111.21 (Beethovenstraße 8) or

 Online!  

Join us for an inspiring talk on the crucial role of higher education in tackling climate change! Discover what role higher education plays in driving the transformation towards a more sustainable future and how we, as students, lecturers, and researchers, can implement changes at our university to amplify our impact.

Let's unite to explore how we can incorporate learning about sustainability into all fields of education! No matter whether we talk about physics, linguistics, or law. We need everyone to achieve a change!

In the following days, we will share the link for the livestream in our Instagram and Facebook stories. You will also find it in our Facebook and LinkedIn events. Don't forget to share this opportunity with your friends, classmates, and colleagues!

**As always, we invited interesting experts and activists from different fields:**

 Prof. Dr. Ulrike-Maria Gelbmann is a Senior Post-Doc and Lecturer at the Department of Environmental Systems Sciences & Global Studies, Chair of the Curricula Committee of the Master's Program Global Studies, and Member of the Scientific Board of Scientists for Future Austria.

 Univ.-Prof. Mag. Dr. Karl W. Steininger is Professor of Climate Economics and Sustainable Transition at the Wegener Center for Climate and Global Change at the University of Graz. He conducts research on the consequences of climate change, their economic dimension, and in particular on emission reduction options in small open economies. (more information: at <https://homepage.uni-graz.at/karl.steininger/> )

 Priv.-Doz. Dr. Federico Italiano is a poet, translator, editor, literary critic, lecturer, and senior researcher at the Austrian Academy of Sciences. In one of his guest lectures at the University of Graz, he delves into the role of translation as a pivotal activity in political, social, and academic reflections concerning anthropogenic climate change.

 Manuel Pirker (BSc.) is a 23-year-old master's student at the University of Graz, majoring in Environmental Systems Sciences/Economics and doing a minor in Political Science. He is an activist at Erde Brennt Graz, focusing on the topics of sustainable traffic and climate education.

 Marek Hubbell is an activist from Fridays for Future Austria.

**After the talk, you can stay for informal discussions, free snacks, and drinks!**
